SELECTED PROJECTS

ERP/EPM MODERNIZATION AT THE UNITED STATES HOUSE OF REPRESENTATIVES (2015-2025)

iLynx led Oracle Enterprise Performance Management Cloud Migration, preparation, and support for upgrade from Hyperion 11.1.2.3.700 to the Oracle EPM Cloud (EPBCS), conversion of existing Oracle Data Integrator and Oracle Financial Data Management Enterprise Edition metadata loads, and actuals, position, payroll, and other data as required to load data from existing on-premise applications to the EPM Cloud nightly and decommissioned existing EPM/Hyperion system.

iLynx performed ERP financials assessment and upgraded PeopleSoft Financials and Supply Chain Management to 9.2 (tools 8.55/56). iLynx also led the PeopleSoft Fluid implementation for scanner and/or phone-based asset disposals, transfer scanning and receiving functionalities. This included assisting with asset mobility projects, IT Asset Management customization and on-going support for the newly implemented Asset Tracking with Mobile Physical Inventory solution, implementation of the fluid asset disposal, fluid asset transfers and fluid receiving scanning projects and other asset related processes, enhancing the single sign-on functionality and implementing Oracle Unified Directory (OUD) and other Identity. *#Oracle #EPBCS #Cloud #Government*

SOFTWARE ASSESSMENT, SELECTIONS AND PMO AT THE CITY OF PHILADELPHIA (2019-2027)

iLynx led needs analysis, software assessment, selection, and implementation program (called OPAL) to redesign processes and implement new Grants, Financials, Supply Chain, Asset and Human Capital Management, and Budgeting System. The OPAL Capital Program provided for the replacement of legacy systems with a market leading Cloud ERP/BI vendor solution. It also included assessment and selections of a Cloud infrastructure provider and infrastructure migration to cloud. *#Cloud #Workday #Oracle #Infrastructure #Government*

IT CHANGE MANAGEMENT SERVICES AT MEDSTAR HEALTH (2013-2014)

Medstar Health converted existing administrative systems functionality from Lawson to Oracle's PeopleSoft Enterprise Resource Planning (ERP) applications. The conversion to PeopleSoft impacted business and system functions in Finance, Supply Chain management and Human Resource management.

iLynx's effort included leading change management during the implementation of this new ERP Systems in six (6) hospitals, 10 corporate entities, 23 diversified businesses, and research institutions. Here, iLynx provided workforce transition guidance, security role mapping, communications, executive outreach, and training services. We developed a four-tier post-production support process that included core functional and technical teams, a Dell helpdesk support team, and 300+ subject matter experts to support 30,000+ customers. *#Oracle #PeopleSoft #Healthcare*
